

ROHIT AWARE

React Native Developer — Pune, Maharashtra, India

+91 95278 86101 — awarerohit01@gmail.com — linkedin.com/in/rohitaware — github.com/Rohit-aware — [Portfolio](#)

Professional Summary

React Native Developer with 3+ years of experience delivering production-grade iOS and Android applications across fintech, e-commerce, sports, and fitness verticals. Proficient in native module development (Kotlin, Swift), complex animation systems (Reanimated v2, Gesture Handler v2), OTA deployment pipelines, and major version migrations. Shipped 5 production apps at Mypcot Infotech with measurable gains in performance and release velocity.

Technical Skills

Mobile: React Native (v0.64 to v0.83), Expo, TypeScript, Reanimated v2, Gesture Handler v2, OTA Updates, New Architecture, Fabric, Turbo Modules

Native: Kotlin, Java, Swift, Objective-C, Native Modules, JSI Bridging, Unity Integration

State Management: Redux Toolkit, Zustand, Context API

Backend and BaaS: Node.js, Laravel, PHP, Firebase, Appwrite, Convex

Testing: Jest, React Testing Library, Sentry

DevOps and CI: Git, GitHub Actions, Docker, Firebase App Distribution

Dev Tools: VS Code, Cursor, Codex, WebGL Antigravity Cursor

Security: Hashing using Crypto, Secure Storage using Keychain

Professional Experience

Mypcot Infotech Pvt. Ltd.

Software Developer, React Native

Mumbai, India
Jul 2023 - Present

- Executed React Native version migrations (v0.64 to v0.72.9 to v0.79.2 to v0.83.2) across 5 production apps, resolving all native dependency conflicts with zero downtime.
- Developed custom Native Modules in Kotlin, Java, Swift, and Objective-C; bridged a Unity game engine module into React Native, enabling in-app gaming without a standalone binary.
- Built an OTA update pipeline using CodePush, eliminating app-store resubmissions for hotfixes and reducing release cycle time by approximately 60%.
- Adopted React Native New Architecture (Fabric renderer and Turbo Modules), reducing cold-start time and increasing UI thread throughput.
- Optimized FlatList virtualization for datasets exceeding 1,000 records, sustaining consistent 60 FPS scroll performance.
- Engineered advanced interaction systems using Reanimated v2 and Gesture Handler v2, including drag-and-drop interfaces and physics-based animations.
- Integrated Firebase, Appwrite, and Convex for authentication, cloud storage, and real-time data sync; configured push notifications and in-app purchases for iOS and Android.
- Established GitHub Actions CI/CD pipelines for automated builds and Firebase App Distribution beta releases.
- Secured sensitive user data using hashing via Crypto and Secure Storage via Keychain across banking modules.

Key Projects

MAAK - Fintech - Banking Application

React Native v0.83.2, Kotlin, Swift, Keychain

Android and iOS — Production

- Built a collaborative Islamic banking app serving users in Egypt, Sudan, and UAE, partnering with local banks to deliver exclusive discounts, promotions, and financial benefits in compliance with Islamic banking regulations.
- Architected multi-bank card management with intelligent transaction routing; integrated bank switches that route calls based on card data to the correct payment switch.
- Developed a service provider panel enabling third-party vendors to independently manage their own services and products, removing admin dependency.

- Secured all user data and financial transactions using hashing via Crypto and Secure Storage via Keychain; app passed VAPT audit and received CBOS approval.
- Delivered the full project within 6 months; currently maintained in production across Egypt, Sudan, and UAE.

CLMS - Client and Loan Management System React Native v0.83.2, Redux Toolkit, MySQL [Android](#), [iOS](#) and [Web](#) — [Production](#)

- Built a centralized client management platform for tracking communication, scheduling follow-ups, logging client history, and sending automated email notifications.
- Managed the full loan lifecycle from application through repayment with real-time status updates and team collaboration features.
- Virtualized list rendering for 1,000+ records with zero frame drops; implemented customizable project templates for flexible team workflows.
- Completed a zero-downtime React Native migration from v0.64 to v0.83.2, resolving all third-party native dependency conflicts.

Trolley - Online Grocery Shopping App React Native v0.83.2, WooCommerce REST API, PHP [Android](#) and [iOS](#) — [Production](#)

- Developed a grocery shopping platform with partnerships with local farms and organic suppliers, offering same-day delivery, scheduled delivery windows, and contactless delivery options.
- Integrated WooCommerce REST API for product catalog management, real-time inventory sync, and a streamlined multi-step checkout flow.
- Designed a user-centric interface with personalized product recommendations, transparent pricing, and easy returns to improve engagement and conversion.

Fantasy 11 - Fantasy Sports Platform React Native, Node.js, MongoDB, Reanimated v2, WebSocket [Android](#) and [iOS](#) — [Production](#)

- Built a fantasy sports platform allowing users to create virtual teams from real players, compete in leagues, and win cash prizes based on live player performance.
- Delivered real-time WebSocket score feeds and player performance updates, enabling informed decisions during live matches.
- Engineered a drag-and-drop team builder with physics-based animations using Reanimated v2 and Gesture Handler v2.
- Implemented encryption protocols to secure user data and financial transactions, building trust for cash-prize gameplay.

Developer Portfolio - Personal SPA React 18, TypeScript, Vite 5, Three.js, Tailwind CSS, WebGL [Live Site](#)

- Built a feature-flag-driven SPA with zero external UI libraries, featuring a 3D particle globe (Three.js), VS Code-style interactive skills terminal, WebGL antigravity cursor, and a rule-based chatbot.

Education

Punyashlok Ahilyadevi Holkar Solapur University
Bachelor of Engineering, Electrical Engineering

Solapur, Maharashtra
Jun 2018 - Jun 2022
